Single pole
1 umbrella
Patented ‘One Move System’
Manual operation
Pole rotates 300°
Specifications

Choose an umbrella which best suits the size of your garden or patio

The P7 rotates 300° to provide shade at each time of day

The integrated rotating element allows you to benefit from the shade at each time of day.

*The small axle locks the umbrella into place and prevents it from spinning with the wind.

Option:

Ground anchor to secure into concrete, made from stainless steel and aluminium.

Stylist cover for steel base.

Fixation

- Ground or wall fixation, according to your preference

OPTIONAL

- Fixation
- Ground or wall fixation, according to your preference

More info: see p. 12
Easy operation

No matter how strong and robust these umbrellas are, you don’t have to be strong to operate them. The patented One Move System helps you to open or close the umbrellas easily in one single movement. No need to move the table while closing or opening the umbrellas. The umbrella opens or closes above standard tables and chairs.

The newly designed gliding wagon provides more strength and makes the operation much more easier thanks to the ergonomic rotary knob (see A).

The umbrellas are ultra-light to handle, thanks to the stainless steel gas spring, which compensates the weight of the umbrella (see B).

The P6 umbrella consists of 1, 2, 3 or 4 umbrellas on one pole. Each umbrella can be operated separately. You choose where you want shade or sun! This makes the P6 umbrella an ideal hospitality partner. For instance the following configurations are possible:

Wall fixation

The P6 pole can be mounted on the wall easily with 2 brackets. This allows for sun protection without having the pole or steel base in the way. Not possible for the Round (RND) version.

The P7 pole can also be fitted to the wall with two “rotating” brackets. By following the sun you can choose where you want shade easily whatever the time of day. The P7 wall umbrella is designed to turn optimally when mounted on a corner.

A small axle locks the umbrella into place and prevents it from spinning with the wind.
Finishing

Pole and frame

The 100% aluminium pole and frame contains 5 decorative colours according to 2 different processes: Powder coating and Anodizing.

The powder-coated profiles have a textured finishing. This makes them even more scratch-resistant and maintenance-friendly. The textured coating of the umbrella also offers an unique look.

Our colour range includes: grey (RAL 9007), black (RAL 9005) or white (RAL 9016).

Anodizing is the second process to provide aluminium profiles with colour. Typical for anodization is that the original structure of the aluminium is retained. The anodizing process ensures a durable, corrosion-resistant and wear-resistant oxide layer.

Our colour range includes:
- Grey (RAL 9007)
- Black (RAL 9005)
- White (RAL 9016)
- Polished silver tint anodization
- Copper tint anodization

Dickson Acryl: 100% solution-dyed
- Weight: 290 g/m²
- Colourfastness: 7 (Standard ISO 105-B04)
- Water-repellent & Stain proof
- Fade resistant

Ozone layer depletion has caused a reduction in the filtering of ultraviolet rays. This, in turn, entails that prolonged, unprotected exposure to the sun poses increased health risks. All P6 and P7 fabrics have the capacity to significantly reduce the penetration of UV rays and offer you and your children the perfect protection from the harmful effects of sunrays (100% of UV rays are blocked).

The Skin Cancer Foundation recommends Dickson Acryl as part of your complete sun protection regime, including regular use of sunscreen.

This label certifies that the fabrics do not contain any toxic substances and do not present any health, skin or environmental hazards (Oeko-Tex 100).

CQ 638/2 IFTH
Connecting several umbrellas is easy by using rain gutters with zippers.

The canopy can be printed with text and/or logo.

Move your umbrella effortlessly thanks to swivel wheels with brakes. Only for the P5.-P6 and P7 UNO umbrellas (max. weight capacity 4 wheels: 320 kg).

The Prostor Repair kit is a unique transparent repair patch for repairing tears and holes in acrylic and polyester fabrics. It is extremely strong and very elastic. The Repair kit is a permanent solution for your umbrella fabric, allowing you to enjoy your umbrella even longer.

> Extremely strong
> Watertight
> Airtight
> Very elastic
> Does not fade
> Does not dry out

When the sun goes down and dusk sets in, Power-LED lighting adds a new, intimately cozy dimension to your umbrella, allowing you to stay put and enjoy the day that little bit longer. The LEDs are installed at the center of the umbrella and can be controlled, and the dimmer module is now nicely stored in the post.

The new 24V LEDs are fully integrated in the umbrella and can, from now on, also be completely dimmed.

Not only the cabling has been completely incorporated, but also the control and the dimmer module are now neatly stored in the post.

A simple press on the remote control turns the light on or off, if you keep pressing, the light intensity will increase or decrease.

There is nothing more glorious than enjoying that good old sun on a radiant day. Or looking for shelter and refreshment in the shade when the sun starts shining too brightly. It’s the perfect spot for reading a book, blissfully watching your kids playing or enjoying a tasty aperitif or a wonderful meal… Prostor takes pride in making that little place in the shade as stylish and functional as possible.

There’s always a solution to suit your needs
As an expert in the development and sales of innovative sunshade systems, pergolas and windbreaks, Prostor offers a range of solutions to suit both smaller and larger patios, ensuring optimal usage of available space. Prostor products are available for private customers as well as professional projects, and cover both the middle and top segments. Always guaranteeing the same impeccable quality, naturally!

Nice to look at, easy to use
That excellence is combined with a stylish design and user-friendly functionality. So you can effortlessly enjoy your Prostor umbrella, pergola or windshield. The combination of high-quality aluminium and superior quality cloth guarantee a sustainable and smart solution for your garden or patio.

Belgian quality, excellent service
The Brutsaert family – who is the driving force behind both Brustor and Prostor – has over 35 years of experience in sun protection. By constantly keeping a finger on the pulse of the latest trends and technologies, and offering excellent service to boot, we realize our ambition and daily motivation: the satisfaction of our customers. They can count on first-rate quality products made entirely in Belgium by an experienced and knowledgeable team. Our sales service runs through a dealer and distributor network with an in-depth knowledge of the market.
